MADE IN CANADA

WHO WE ARE

Since 2012, our manufacturing plant, Be Well Canada Spa, has established itself as a leader in the production of exceptional quality spas, driven by a passion for well-being and innovation. Located in Canada, our factory is the heart of our operations, where every spa is designed and engineered by our team and manufactured entirely on-site. Over the years, we have gained increasing recognition in the global spa market, and our production capacity has tripled to meet international demand.

We take pride in manufacturing the Maple range, a collection of spas that combines comfort, aesthetics, and performance. Each model is crafted with carefully selected materials, ensuring durability and luxury.

Thanks to our commitment to quality, our spas are distributed across all continents: America, Europe, Australia, Africa and Asia, allowing thousands of customers to enjoy an unparalleled relaxation experience.

Our mission is to provide you with spas that create a true wellness environment, blending modern technology with expert craftsmanship.

PREMIUM EQUIPMENT SERIES

Touchscreen Keypad

A touchscreen keypad for a spa offers intuitive control and easy navigation to adjust the temperature, jets, and lighting with a simple touch of the display. Its simple clear display enhances usability.*

Volcano Jet

The Volcano jet is an impressive and powerful jet that specifically targets the arch of the foot, providing a personalized and relaxing massage. The integration of the Volcano jet significantly enhances the comfort and well-being of users.*

Waterline LED

The waterline LED in a spa is built-in lighting that creates a relaxing atmosphere with customizable colors. It enhances aesthetics by illuminating the spa's contours, making your spa experience enjoyable, even in the dark.*

Colored LED Lights

The power of color on our health! Chromotherapy has multiple health benefits using colored lights. It can help with insomnia, restore energy, reduce anxiety and stress or strengthen the immune system.*

Waterlab

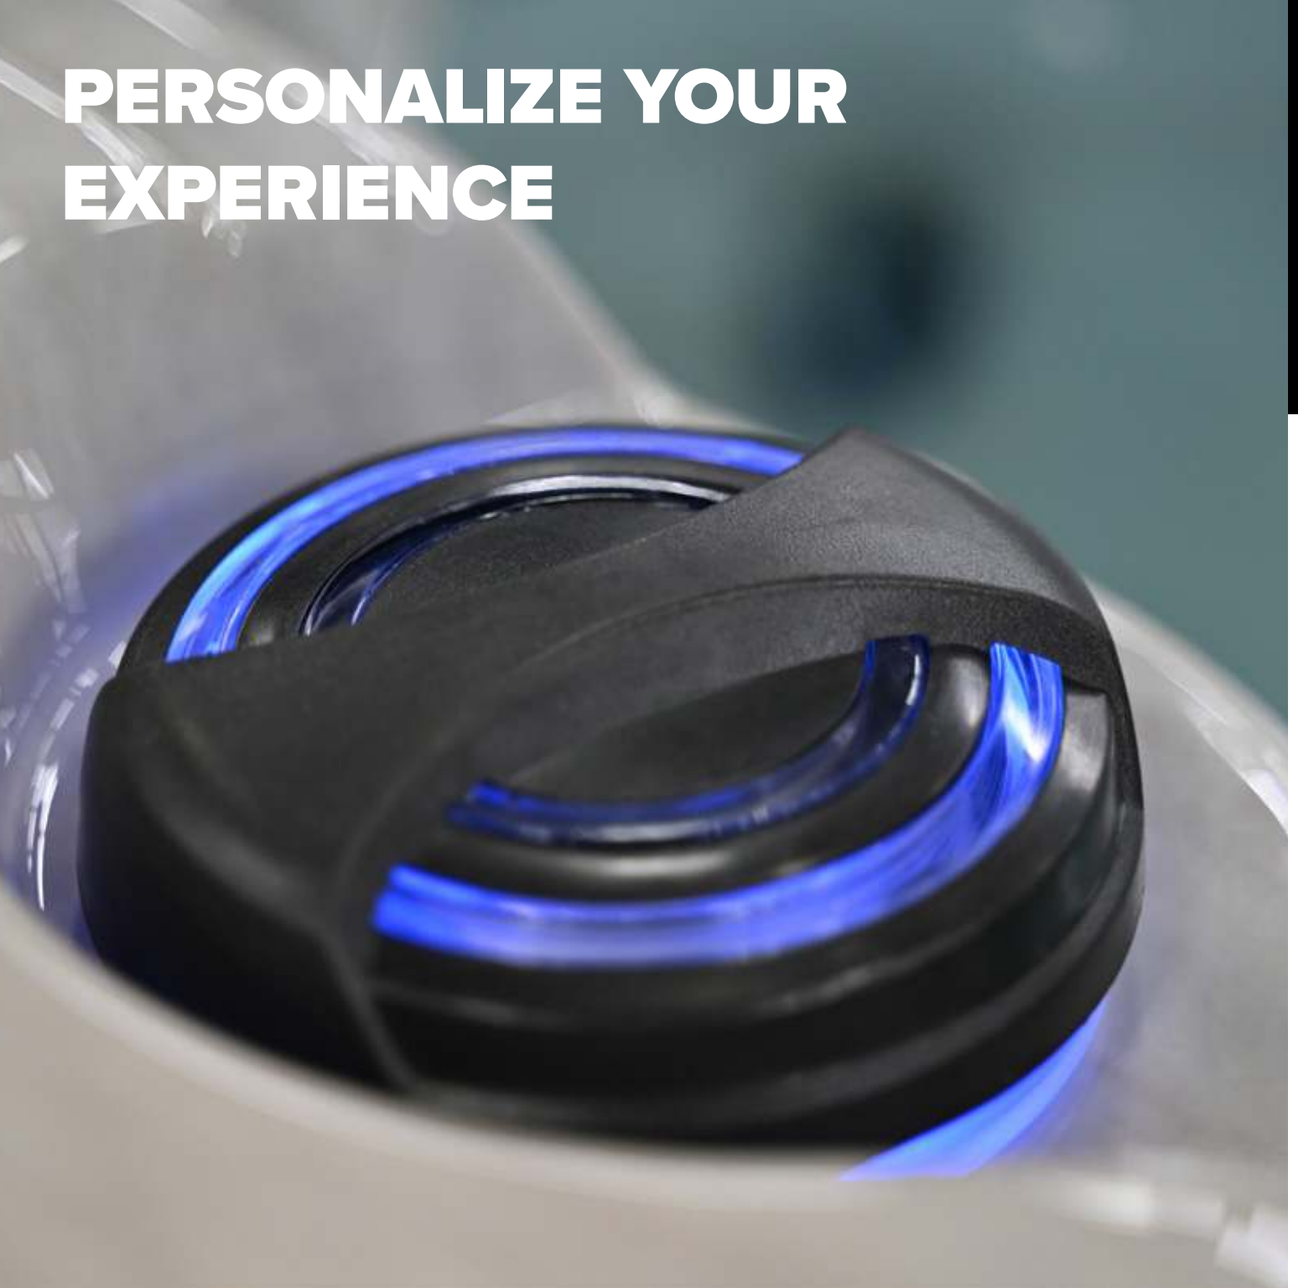
Waterlab monitors your spa water with precision, no strips, no guesswork. You receive clear, personalized guidance directly on your phone to keep your water perfectly balanced and crystal clear.*

Energy-efficient pump

All our dual-speed pumps are engineered to combine performance and energy efficiency. They reduce energy consumption during filtration while delivering a powerful and consistent massage experience through their dual-speed operation.*

*see all specifications and options on page 35

PERSONALIZE YOUR EXPERIENCE



Waterlab Probe

New product

The Waterlab probe unlocks the full Waterlab system, giving you access to intelligent water management.

Easy to install at home, it quickly connects to your spa and continuously monitors key water parameters. With precise, real-time measurements, you receive personalized guidance to maintain perfectly balanced water with ease.

Enjoy consistently clean, healthy, and perfectly controlled water, without the guesswork.*

Bluetooth Audio

The Bluetooth speakers in your spa allow you to easily play your favorite music from a mobile device.*

Wi-Fi

This control system allows remote access to your spa via a smartphone or tablet. It lets you adjust the temperature, jets, and lighting from anywhere.*

InClear (US only)

The InClear system is a disinfection solution for spas that uses a salt generator to continuously produce sanitizer from dissolved salt, keeping the water clean and clear while reducing chemical usage.*

UV Ozone

UV ozone is a disinfection system that combines ozone and ultraviolet (UV) light to purify spa water. UV destroys pathogens by altering their DNA. Ozone, a powerful disinfectant is injected into the water, quickly eliminating bacteria, viruses, and contaminants.*

FABRICATION
QUALITY & INNOVATION

All our spas are tested under real-life conditions at our manufacturing facility. The performance and the various functions of the spa, can thus be verified under optimal conditions.

1 The Shell

The shell is thermoformed and laminated, providing excellent temperature resistance. Each acrylic sheet is carefully selected to ensure the quality and durability of the product.

2 The Frame

The frame of our spas is made of premium treated wood and is 100% assembled in our factory. The frame is made of autoclaved wood, which means it is protected against biological damage and is resistant to weather and moisture.

3 The Insulation

The insulation of our spas is optimized to ensure minimal energy consumption. We use high-density polyurethane foam, equipped with two thermoreflective faces.

4 The Base

It isolates electrical components from the ground. Its role is also to support the weight of the tank and to ensure its stability and balance.

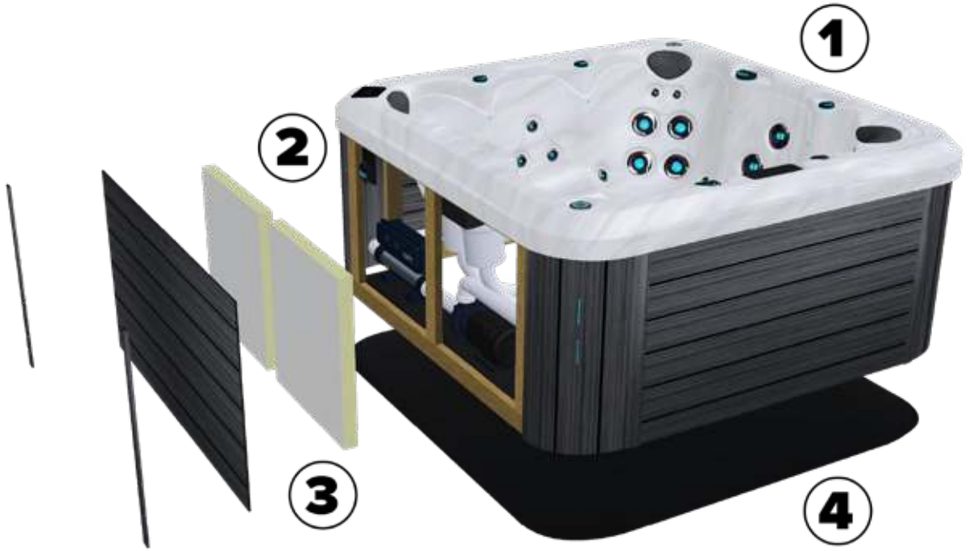
Our Expertise

Made in Canada
Fabriqué au Canada



A spa with exceptional durability, our expertise in spa manufacturing allows us to guarantee unparalleled quality standards, supported by rigorous quality control and specialized engineers and technicians. We select high-quality materials to ensure enhanced durability. Designed to withstand all climates, the Maple spa is the preferred choice for customers seeking reliable performance, and energy efficiency.

HYDROMASSAGE
THE BENEFITS

The different jets in a spa, whether small or large, offer numerous benefits. They target various areas of the body for a personalized massage experience.

Metacarpal Jet

A metacarpal jet focuses on the hands and wrists, using targeted water pressure to alleviate tension and enhance circulation. It's particularly beneficial for those with carpal tunnel syndrome, offering relief and relaxation.

Volcano Jet

A Volcano jet in a Maple spa is a powerful jet that creates a powerful upward pressure jet with an intense water flow. It provides a deep massage, ideal for the lower back or the arch of the foot, and contributes to muscle relaxation.

Jet Sizes

Jets come in different sizes (2", 3", 5") to provide varying intensities and coverage areas, ensuring a personalized hydrotherapy experience that caters to specific muscle groups and relaxation needs.

Directional Jet

This adjustable jet provides targeted water pressure, adjustable to massage specific areas like the back and shoulders. Used for therapeutic massage and muscle tension relief.

Rotating Jet

The rotating motion of this jet provides a circular massage, covering a larger area than static directional jets. It improves blood circulation and relaxes tense muscles with its swirling motion.

Neck Jet

Neck jets target tension in the neck and shoulders, improving circulation while helping to reduce stress and headaches, leaving you feeling refreshed and relaxed
